- ▶ what can we do

# Learning for classification

## Example: dog vs. cat?

- ▶ We have 5000 pictures of dog and 5000 pictures of cat.

- ▶ Computer digitalize each picture into  $100 \times 100$  pixels.
- ▶ Given a new picture, we want to answer: is it a dog or a cat?
- ▶ Simple task for human, dog, or cat.
- ▶ ? claimed this is a difficult task for machines with only 82.7% accuracy.

# Future work

# To get benefit?

- ▶ Fingerprint identification
- ▶ Voice recognition
- ▶ Information assistant

# To contribute?

- ▶ SETI@home
- ▶ Rosetta@home
- ▶ Foldit

# Bibliography
